

LINCOLN LABORATORY MILITARY FELLOWS PROGRAM APPLICATION

Each year MIT Lincoln Laboratory supports active duty military officers by awarding Lincoln Laboratory Military Fellowships. The Fellow will perform research at Lincoln Laboratory approximately two days a week during the academic year. Lincoln Laboratory pays the Fellow's tuition and fees. If the Fellow is enrolled in graduate program, the student is required to complete a thesis. The thesis topic corresponds with the research they will be doing at Lincoln Laboratory. The student will have both a Lincoln Laboratory and University academic advisor. The student's Laboratory supervisor will be their advisor for their day-to-day work. The officer will also have an academic advisor on campus whose primary responsibility is to ensure that all of the Department's requirements will be met for graduation. If assigned with Training with Industry, the officer will be assigned full time with a specific group. Senior Service School candidates will do research at the Lexington campus while taking national security management courses at your chosen school. Potential Military Fellows must be either enrolled in a graduate degree program that requires a thesis, sponsored by Training with Industry, or sponsored by their respective service for Senior Service School.

Name: _____ GPA: _____

Address: _____

E-mail: _____ Phone: _____

Undergraduate school / area of study: _____

Graduate school / area of study: _____

Have you worked as an intern at Lincoln Laboratory _____ If so, which group _____

Select your area(s) of interest: ([see detailed descriptions of mission areas](#))

- Communications Systems
- ISR Systems and Technology
- Engineering
- Advanced Technology
- Tactical Systems
- Homeland Protection
- Air Traffic Control
- Air, Missile, and Maritime Defense Technology
- Space Systems and Technology
- Cyber Security and Information Sciences

What specific type of research interests you? (i.e., cyber, space systems, ISR, etc.)
